

vaccine_VA Codebook

A dataset containing information about the number of COVID-19 vaccine doses administered in Virginia from 12-16-2020 through 3-4-2021.

Date	The date.
Location	U.S. state in which the doses were administered.
Administered	The cumulative number of COVID-19 vaccine doses that had been administered in the state by the indicated date.
number_of_days	The number of days since 12-15-2020.
output_VA	The number of COVID-19 doses administered in Virginia on a particular date. This variable was obtained by subtracting successive values of the Administered variable.
