vaccine_MD Codebook

A dataset containing information about the number of COVID-19 vaccine doses administered in Maryland from 12-16-2020 through 3-4-2021.

Date   The date.

Location   U.S. state in which the doses were administered.

Administered   The cumulative number of COVID-19 vaccine doses that had been administered in the state by the indicated date.

number_of_days   The number of days since 12-15-2020.

output_MD   The number of COVID-19 doses administered in Maryland on a particular date. This variable was obtained by subtracting successive values of the Administered variable.
